Circle Economy Amsterdam, 2020

8.6% of the global circular economy is circular.

This is LESS than in 2018...

Highest use of materials ever: 100 billion tonnes

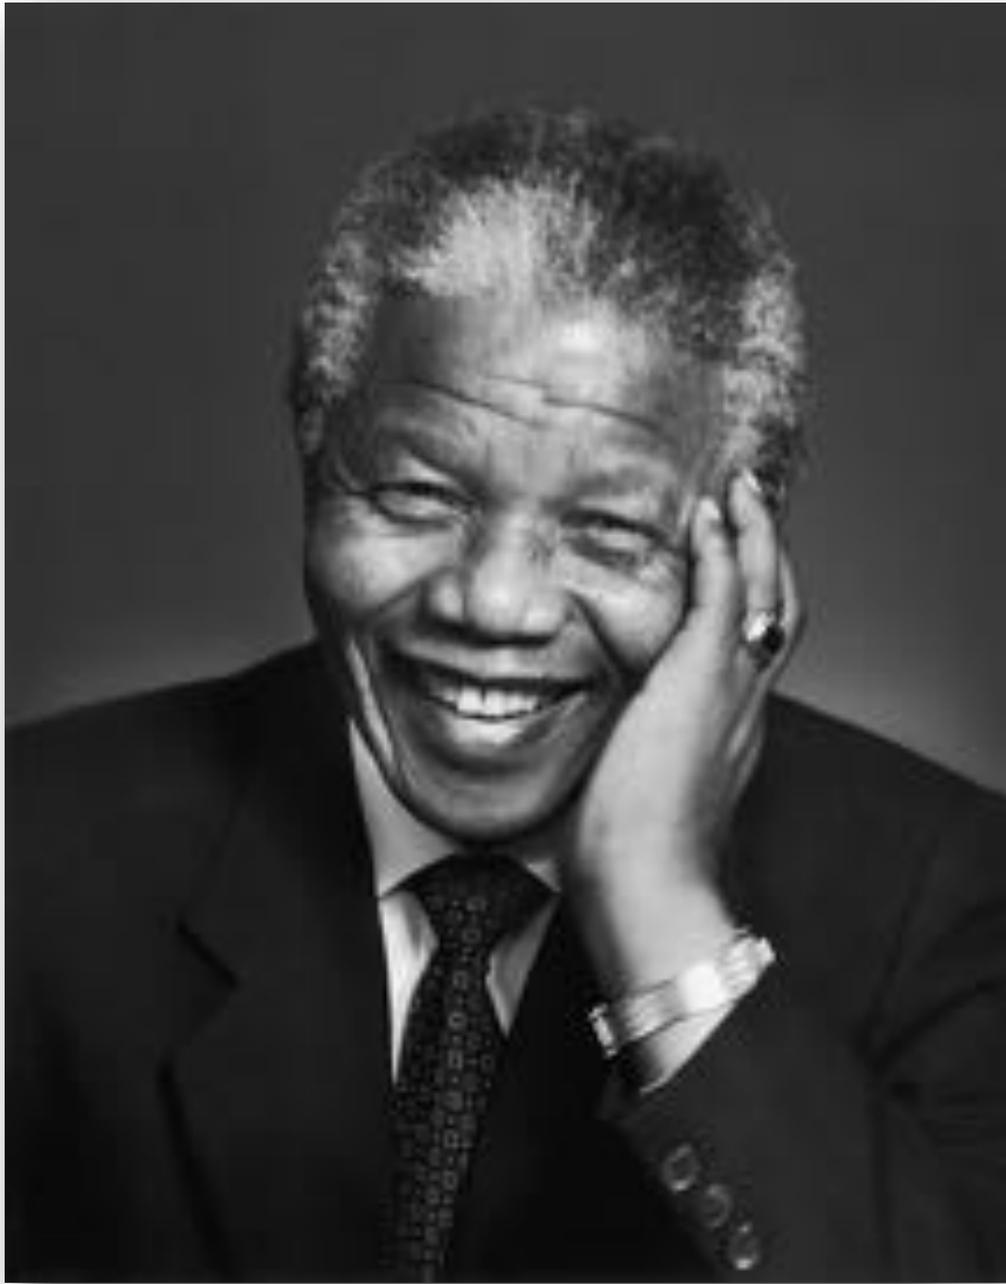

Growing population:

- **growing extraction of virgin materials**
- **ongoing stock build-up**

Old habits (and dito BMs):

- **low end-of-use processing**

Pathways forward?

- Bad news!

**"It always SEEMS
impossible until
it's DONE."**

-Nelson Mandela

CE is a system, change is slow

Sustainable use of natural resources

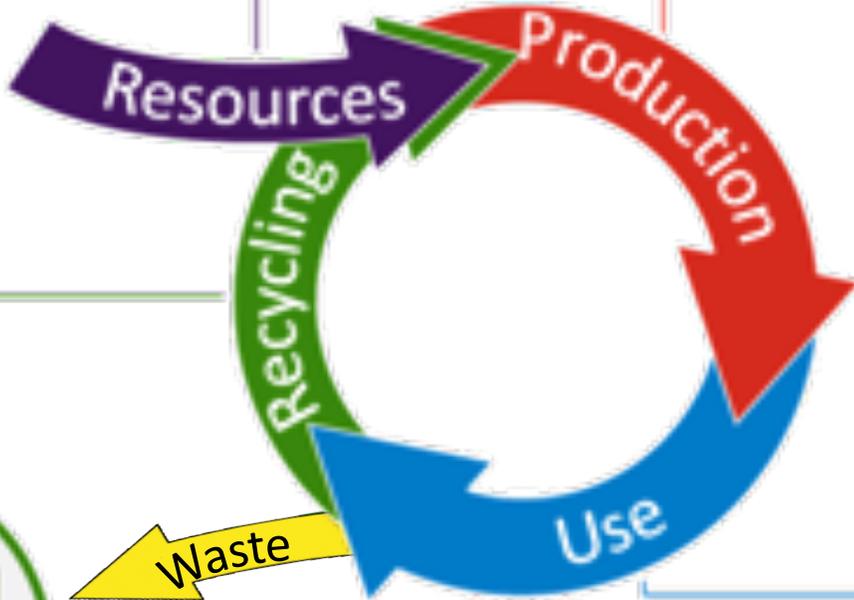

Focus in design and production on closing loops

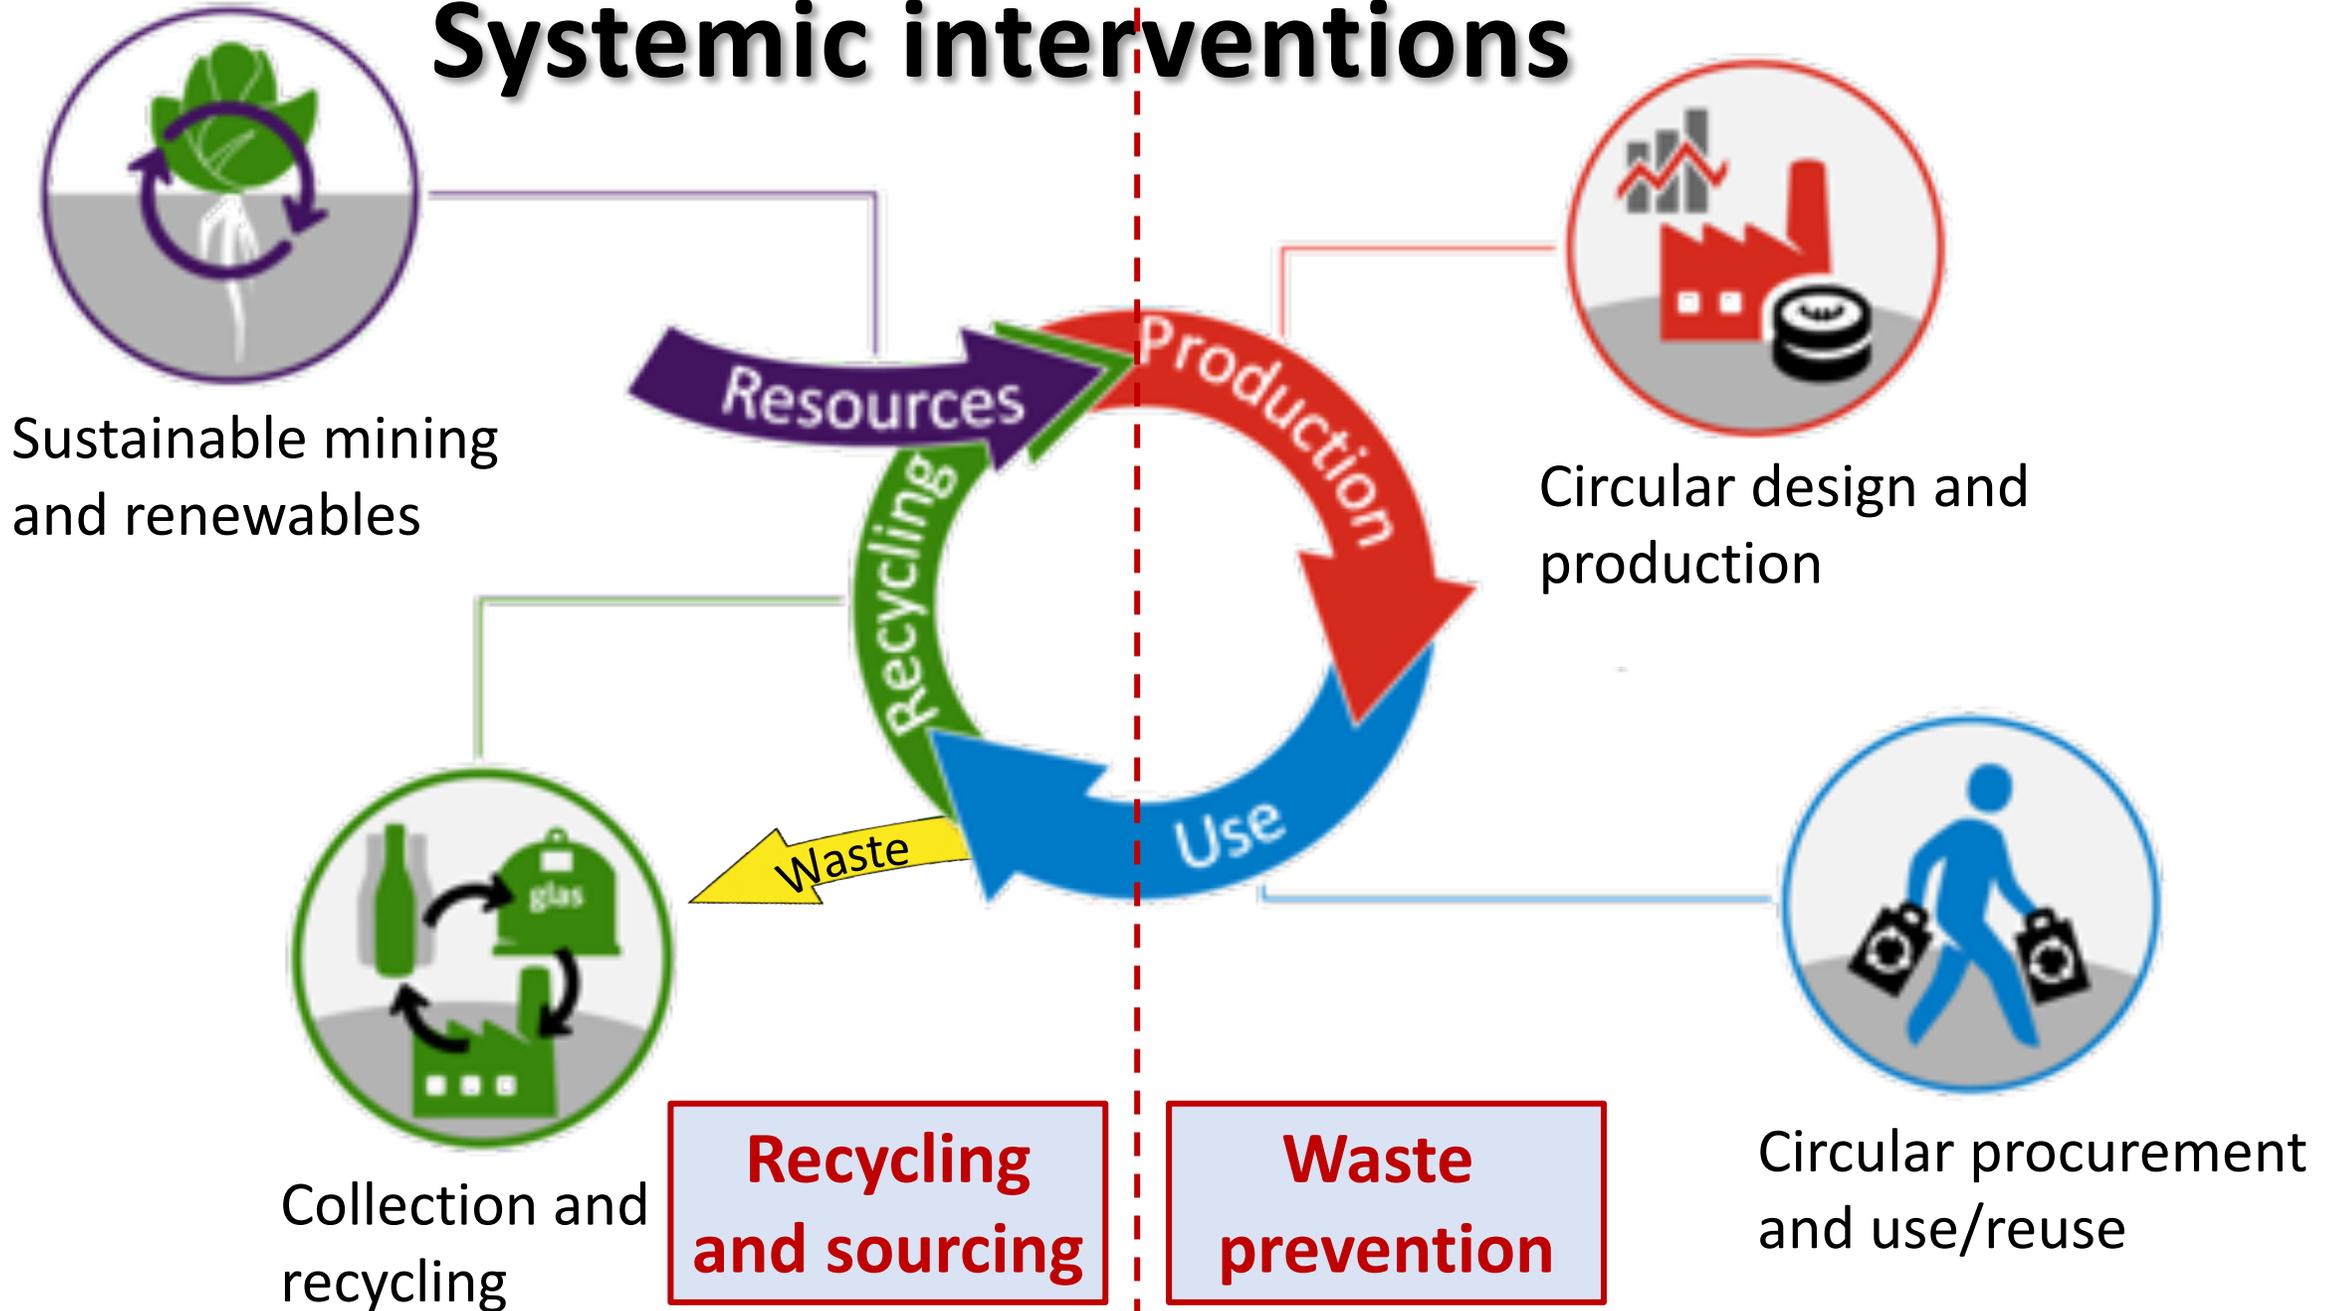

More and better recycling

Conscious use of products

Systemic interventions

International collaboration CE does not stop at borders

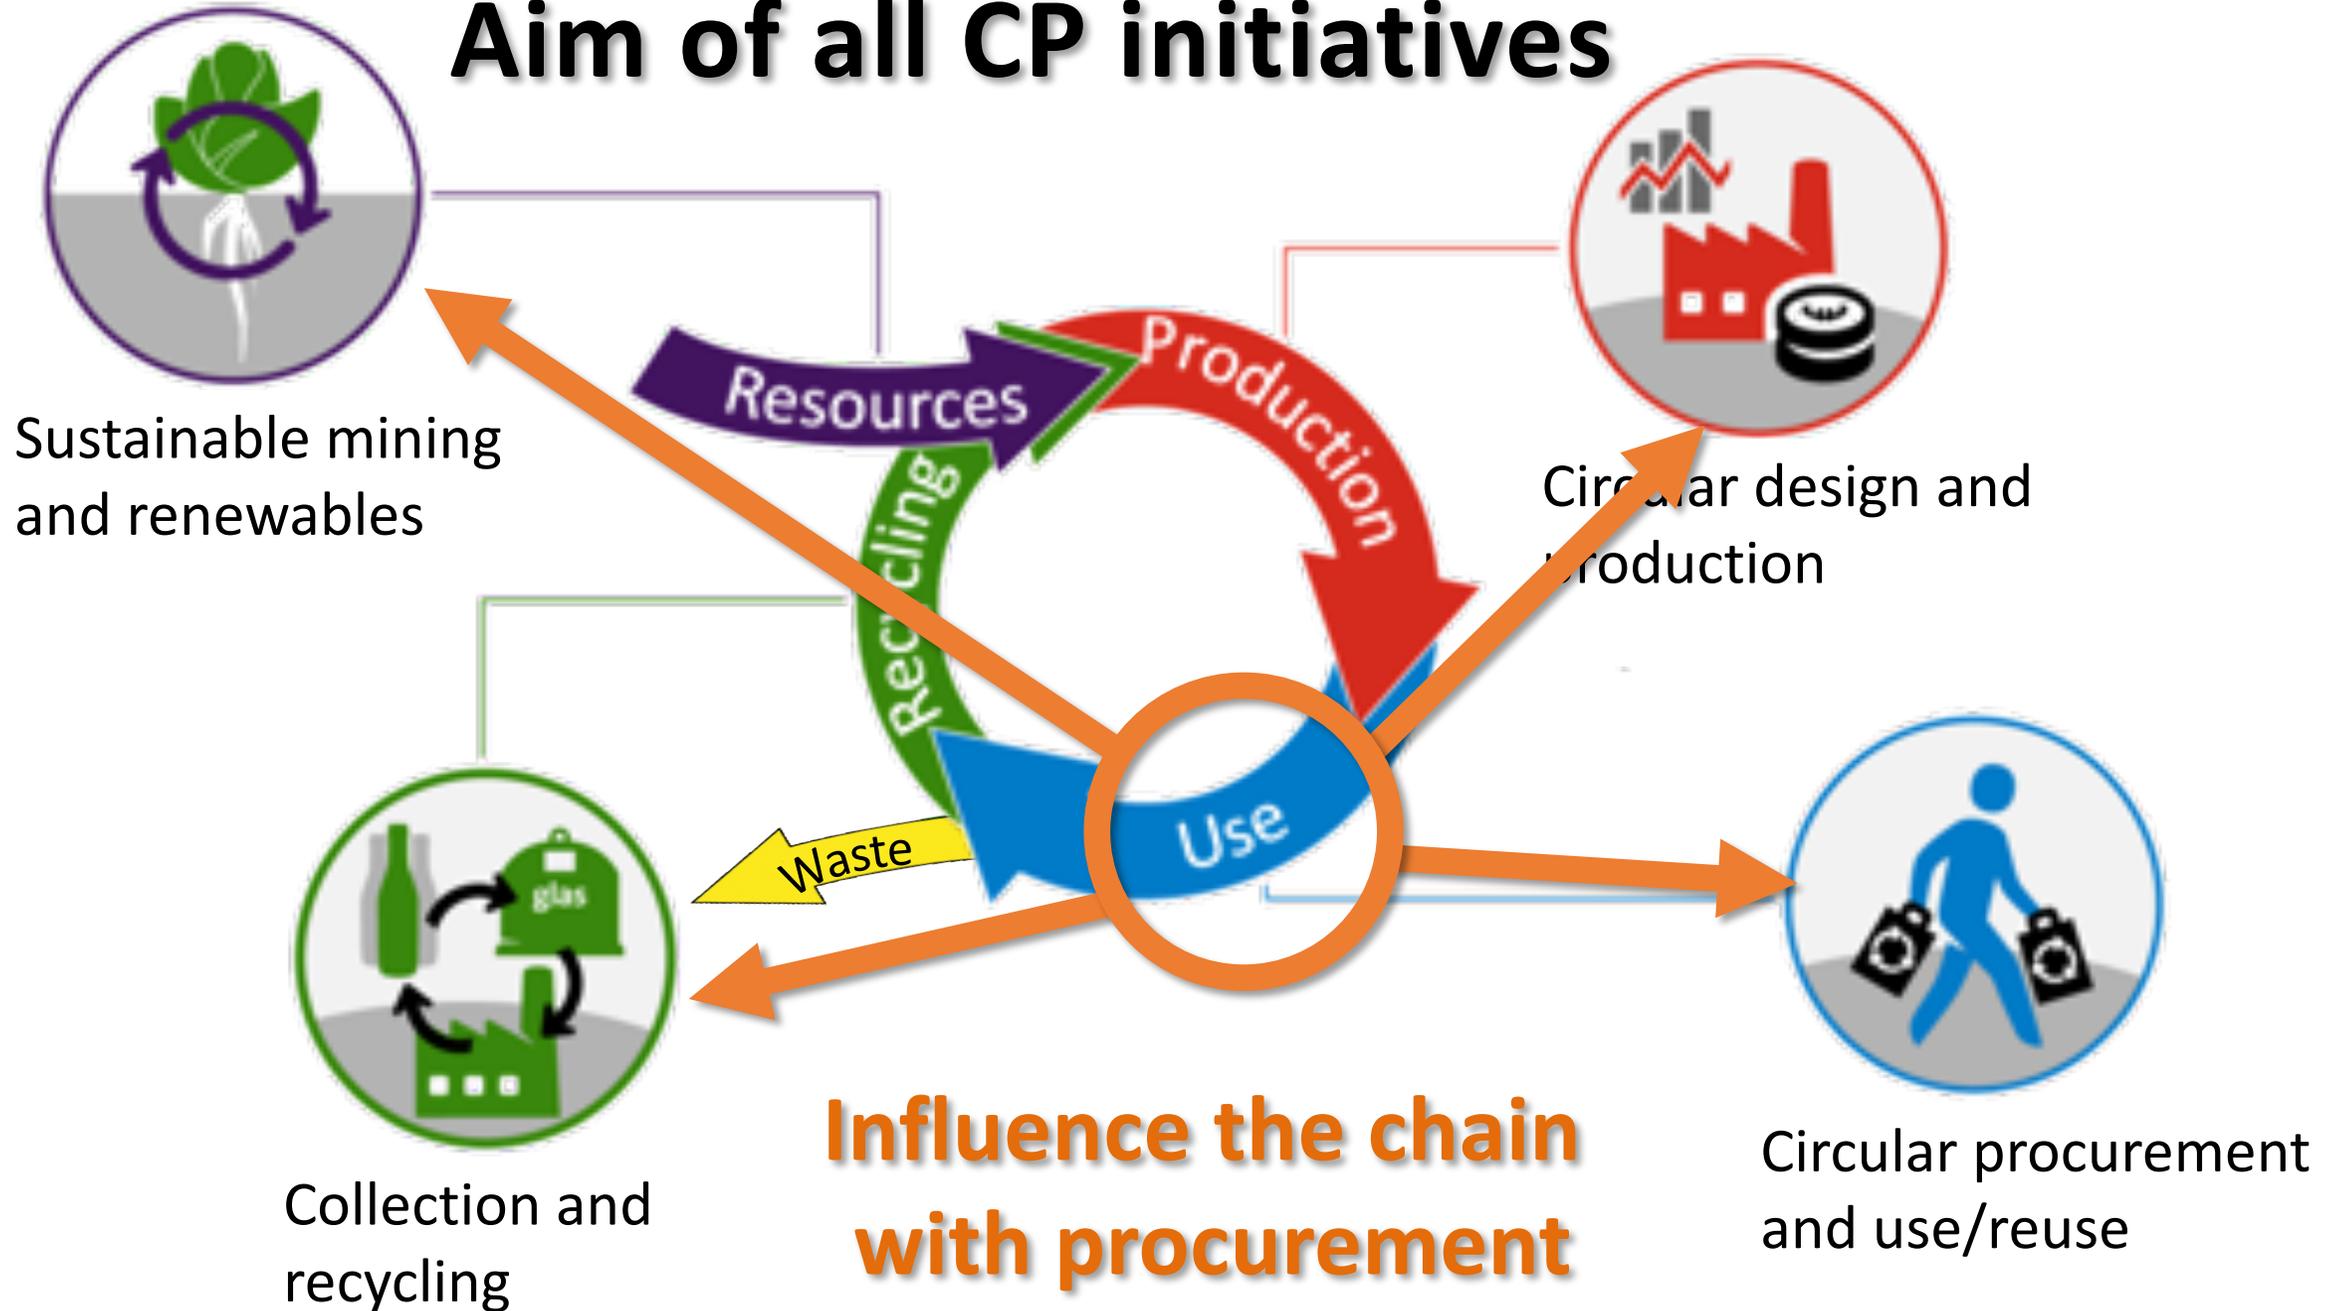

- **Circular Procurement Networks:**
Netherlands, Flanders, Paris, Centro Regio, Finland (*Czech Republic, Ireland, USA, Singapore*)
- **Transnational projects:**
ReBUS, **CircularPP**, ProCirc, Urban Agenda, Urban Wins, CityLoops, ...
- **International initiatives:**
UN One Planet Network SPP and SBC programmes, ICLEI CP Interest Group, ACR+ CP Working Group, ICT sector approach ARCTIC, CP Congresses (2016, 2017, 2020 CPP, 2021?)

C-PRONE - international CP umbrella

- International exchange of insights between initiatives, projects and networks
- Supportive to (new) initiatives
- Organise the next CP Congress?
- **C-PRONE**
= Circular **PRO**urement **NE**twork
= **CHAPERONE**

Aim of all CP initiatives
